eLocal Listing Runs With SAP® Business One

November 15, 2007

(Temecula, CA) – eLocal Listing, LLC, announced today that they have successfully completed Phase IA of their SAP® Business One installation. This phase replaces Accounts Payable, General Ledger, and Budgeting.

Tim Judd, CEO of eLocal Listing, LLC noted that, “As expected, Vision-33 exceeded our expectations in support and product delivery. The synergy between the two companies played an important role in such a successful and stress free installation. We knew we were making the right decision to partner with Vision-33 to replace our legacy systems and the expertise and dedication of the Vision-33 staff, with special mention to Paul Kudla our Project Manager, confirms our decision. During the vendor selection process it appeared that Vision-33 customers were fans rather than customers; eLocal Listing has joined their fan club.”

Phase IA is just the first in what will become a complete replacement of legacy systems in response to our continued growth and commitment to providing the highest quality care to our customer base.
